## Olscamp praises accomplishments; looks to future

An enthusiastic President Paul Olscamp delivered his sixth "State of the University" message to faculty and staff last week and declared the University to be in "good overall condition."

Olscamp touched on a number of topics including accomplishments of the past year, some goals for 1987-88, progress reports on several campus projects and some concerns.

One of the past year's top accomplishments was the successful completion of the 75th Anniversary Fund, which in just a year and a half raised \$15.2 million. Not only was the campaign a success financially, but it resulted in a higher level of giving and an increase in the number of contributing alumni as well as greater support from the business community.

Fundraising this year will be aimed at several smaller projects including a \$400,000 campaign to support the opera program in the College of Musical Arts, Olscamp said.

Another major accomplishment was the approval by the Board of Regents of a doctorate in applied philosophy, which as the only program of its kind in the world has attracted a great deal of national and international attention.

The next doctoral program on the University's agenda is one in photochemical sciences, an effort that will be "a long one facing several hurdles" but one worth pursuing, Olscamp said.

Olscamp said he was pleased with the acceptance of the Great Ideas program begun a year ago on an experimental basis in the College of Arts and Sciences. Team-taught by faculty and graduate students, the courses were popular with students and this fall will be required by journalism, English and creative writing students.

He reported progress on the general education curriculum, which

Faculty and administrative staff enjoy refreshments prior to Opening Day ceremonies Aug. 24 in Lenhart Grand Ballroom of the University Union. Programs were held throughout the day by colleges and departments to welcome back staff from the summer recess. The 1987-88 academic year began in full swing with students returning to classes last Wednesday.

now requires students to take eight courses designed to provide them with knowledge in the arts and humanities, the sciences and multicultural studies. However, Olscamp said the general studies core requirements still must be fine tuned because some students can enroll in programs without taking all the general studies courses.

Another bright spot has been the telecommunications system which is now a normally functioning, profit-making arm of the University. Revenues are better than predicted and a special state grant has helped defray costs of the system. More than 5,200 students have signed up

with the campus system and will generate nearly 70 percent of the system's gross toll revenue.

On tap for the coming year, Olscamp said, are greater efforts in the recruitment of minority students and in hiring minority faculty and staff. He cited statistics showing a 41 percent increase in minority faculty and staff this year and an increase from 101 to 140 new minority students, but added that "more has to be done to attract minorities to this campus."

Olscamp also said that Bowling Green will continue to draw to the campus distinguished visiting professors and upgrade the library

so that the University can qualify for membership in the Association of Research Libraries. "We are now in the top 10 of the criteria used to judge candidates for membership," he said, adding that being in the ARL will greatly enhance the University's national reputation.

Another major goal will be to prioritize the Role and Mission Statement. Olscamp said "significant progress" has been made toward many of the goals in the statement but that "we need to focus efforts in the most fruitful way possible" and that he will ask for

*Continued on page 3*

Dr. Douglas C. Neckers (center), became the third winner of the Paul and Ruth Olscamp Research Award last week. The award is given annually to a member of the faculty for outstanding scholarly or creative accomplishments during the previous three-year period. The \$1,000 prize was established by President Olscamp and Ruth Olscamp, (left) who is clinical coordinator in the communication disorders department. Neckers chairs the chemistry department, is founder and executive director of the Center for Photochemical Sciences and was named last year as the University's first Distinguished Research Professor.

## Wolfe calls for University staff to work together in 87/88

Calling for faculty, staff and administrators to work together in a way that will "form a more perfect" University, Dr. Ralph Wolfe, Faculty Senate chair, announced a number of goals the senate will be working toward during the next academic year.

Addressing the audience at the Aug. 24 Opening Day ceremonies, Wolfe, who has been at Bowling Green for 20 years, said based on his recollection of the years prior to the senate's creation, the University now is a "far, far better place" because it has a Faculty Senate.

"I believe in, and have a strong commitment to, the Faculty Senate and to its Charter-mandated responsibilities, and I further believe that the Faculty Senate, over the years, has had a significant positive impact on the quality of life for our academic community," Wolfe said.

"In order to make Bowling Green State University a more perfect university, we need Faculty Senate meetings where we can have dialogue on issues — an arena

wherein a thesis may be offered, followed by the antithesis which results in the synthesis, which then becomes the policy we recommend to the president and the Board of Trustees," he said.

Looking ahead to the 1987-88 academic year, Wolfe said senators will be working on a variety of issues.

The Faculty Welfare Committee will continue to study the economic condition of the faculty and will consider the weight to be given to performance rating as a basis for determining compensation. The committee also will study the issues related to part-time faculty.

In addition, committee members will continue consideration of cost containment measures in the faculty health coverage package and will make an assessment of the quality of the faculty's working environment.

In academic matters, Wolfe said the Committee on Academic Affairs

# Classified staff to gather for convocation Sept. 14

President Paul Olscamp will address all classified staff members at the annual convocation to be held from 9-11 a.m. Sept. 14 in the Lenhart Grand Ballroom of the University Union.

Also presenting comments will be Dr. Karl Vogt, vice president for operations; Bob Kreienkamp, chair of Classified Staff Council, and Sam Ramirez, employee relations adviser. Refreshments will be served prior to the convocation.

Deans, chairs, directors, managers and supervisors are requested to release classified staff from their assigned work stations to attend the convocation.

To assist classified staff in attending the convocation, campus busses will be available for all outlying locations as follows: Bus 1

will depart at 8:30 a.m. from the east side of the football stadium to pick up staff at the north side of the Ice Arena. At 8:25 a.m., the bus will arrive at the road between the Health Center and Moore Musical Arts Center, where it will depart at 8:30 a.m. It will continue to Kreischer Residence Hall parking lot on Mercer Road and depart there at 8:40 a.m. The bus also will stop at Conklin Hall and Rodgers Quadrangle before continuing to the University Union.

Bus 2 will leave from the plant operations/inventory control area at 8:45 a.m. and proceed directly to the University Union. A van will depart from the television station at 8:40 a.m.

All busses and the van will return staff to their respective areas after the conclusion of the convocation.

## Fourth technology briefing set

The fourth in a series of technology transfer briefings sponsored by the McMaster Leadership Institute will be Sept. 8 from 8:30-10 a.m. in the Seneca Room of the Dana Center in Toledo.

Dr. Carol Heckman, director of the Electron Microscopy Facility, will be the featured speaker. Her topic, "Regional Microscopy and Microanalysis Resources — Making Your R & D Budget Go Further," will concentrate on two major subjects. She will review the capabilities of several regional labs that offer services in microscopy and microanalysis most often used for problems in quality control and product liability, and increasingly in

new product development.

Secondly, Heckman will provide some examples of the technological applications of microanalysis resources, such as trouble shooting assembly line materials, testing toxic materials, and assigning the cause of failure in systems made up of multi-vendor components.

The McMaster Institute, created a year ago with a \$1 million gift from Harold and Helen McMaster of Perrysburg, focuses on ways scientific and technical industry can profit and grow.

Additional information and registration for the free program are available by calling the McMaster Institute at 372-6819.

Dr. Ralph Wolfe (right), chair of Faculty Senate, presents Dr. Ron Stoner, physics and astronomy, with the Faculty Distinguished Service Award. The \$1,000 award, which recognizes outstanding continuous service of University faculty, was presented last week at Opening Day ceremonies. Stoner, whose major field of study is theoretical physics, has been the recipient of numerous grants, has been active in Faculty Senate and on various committees, and in 1980, received a Fulbright Faculty Award for a senior lectureship at the University in Sri Lanka.

## Predictions could be easier

### W-4 form deadline approaching

Taxpayers who have not filed their W-4 or W-4A forms yet, have only a month to do so.

Wage earners must file the new withholding form by Oct. 1, or face having the maximum amount of taxes allowable withheld from their paychecks. If the University's payroll office does not receive the form, the office will be required to change the employee's tax status automatically to single and one exemption, which could result in overpaying federal income taxes for 1987.

Taxpayers were encouraged to file by June 1 to qualify for a one-year-only leniency clause that guaranteed they would not be penalized even if withholdings during the year fall more than 10 percent short of their 1987 tax bill. Taxpayers filing after June 1 may be subject to the full penalty process if they have not calculated withholdings properly.

For taxpayers who didn't file by June 1, they still might have something in their favor. University treasurer Gaylyn Finn said they might

be able to more accurately predict their withholdings for the year because they have a better idea of their total earnings.

"Employees who have to file yet can look at their pay stubs and probably calculate fairly close what their withholdings are going to be," Finn said. "But people with grants, consulting stipends and other outside monies are going to have a little more trouble predicting."

According to Finn, the tax law was intended to be revenue neutral as the government attempted to "fine tune" withholding. Once taxpayers learn to accurately predict their withholdings, employers will be able to deduct exactly what employees owe in taxes. The difference in the plan will be seen in the spring when large tax payments or refunds will be avoided.

University employees with questions about the forms are being advised by the payroll office to contact their own tax advisers or a local IRS office.

## Music and art to be showcased

Thirty new works by some of the finest composers living today will be showcased at the eighth annual New Music and Art Festival Oct. 22-24.

The recent name change — from New Music Festival to New Music and Art Festival — reflects the festival's expansion this year to provide a forum for contemporary art as well as music.

Music to be performed has been selected from a record 700 entries — nearly 300 more than a year ago. Nearly all of the composers whose works are chosen for performance attend the event.

As in the past, this year's festival will feature concerts, lectures and panel discussions but there will be a contemporary art exhibition as well.

Highlighting this year's performances will be appearances by special guests Joan LaBarbara, Morton Subotnick and the Theater Chamber Players of the Kennedy Center, Leon Fleisher and Dina Koster, directors.

The School of Art is contributing to this year's festival by organizing the exhibition, "Of New Account: The Chicago Imagists," that opens Friday, Oct. 23, in the University's Fine Arts

Gallery. The movement is one that has developed over the last 15 years by a group of Chicago artists. Though working in various modes, they produce art with common formal and expressive characteristics.

Works by a number of the originators of this style will be represented in the exhibition. They include artists Roger Brown, Art Green, Nilsson, Jim Nutt, Ed Paschke, Barbara Rossi, Karl Wirsum and Ray Yoshida. The exhibit will be on display through Nov. 20 at the Fine Arts Gallery.

All of the events, except the Chamber Players, are open to the public free of charge. Tickets for the Thursday concert by the Chamber Players of the Kennedy Center can be obtained by calling the Moore Musical Arts Center box office at 372-8171.

The New Music and Art Festival is presented annually by the College of Musical Arts with support from the University's School of Art, the Ohio Arts Council, the Arts Commission of Greater Toledo, the Toledo Modern Art Group, Arts Midwest, Medici Circie and Pro Musica, among other organizations.

George Howick, (left) director of the Management Center, is the 1987 recipient of the Michael R. Ferrari Award, presented during a reception for administrative staff last week by Gregory DeCrane (right), who won the award last year. Howick was cited for his efforts in bringing recognition to WBGU-TV and to the Management Center as producer and host of Channel 27's weekly series, "Ohio Business Outlook," for his assistance to students through his classes; for his ability to bring a wide range of speakers to campus, and as administrator of the University's Entrepreneurship Training pilot program.

## Take a holiday

University offices will be closed Monday, Sept. 7 for Labor Day. No classes will be held. Only those University activities deemed essential by area supervisors will continue that day.

## Series to have wide variety

Season tickets for the Festival Series and the Young Concert Artist Series at the Moore Musical Arts Center go on sale to the public Monday (Aug. 31).

The 1987-88 Festival Series, presented each year by the College of Musical Arts, offers more variety than ever.

It opens Sept. 26 with Stoltzman and Douglas, the duo of Grammy award winning clarinetist Richard Stoltzman and pianist, bassoonist and composer Bill Douglas.

The Theater Chamber Players of Kennedy Center perform next in the series — and open the 1987 New Music and Art Festival — on Oct. 22.

On Dec. 4, the Waverly Consort comes to Bowling Green in "The Christmas Story." Premiered at the Metropolitan Museum of Art in 1980 and recorded on CBS Masterworks, the holiday production is based on some of the most important medieval manuscripts detailing the story of Christmas.

The following concert will be the Modern Jazz Quartet on Feb. 23, 1988. With more than 30 albums, John Lewis on piano, Milt Jackson on vibraphone, Connie Kay on drums and Percy Heath on bass, are pioneers of the jazz ensemble crossover into the classical concert hall.

Climaxing the series on April 9 will be a performance by the Pilobolus Dance Theater. The dancers, who have been described as "six of the most extraordinary people now performing," are known for their blend of acrobatic and dance movements and their sense of humor.

All Festival Series performances begin at 8 p.m. in Kobacker Hall of the Moore Musical Arts Center. The Festival Forum, a performance preview with Dr. Vincent Corrigan, musical arts, takes place at 7:30 p.m. in Bryan Recital Hall.

Season tickets also go on sale Monday (Aug. 31) for the Young Concert Artist Series.

That series begins Nov. 10 with Pendulum, the duo of vibraphonist Ted Piltzecker and pianist Jim Hodgkinson. Cellist Marcy Rosen, winner of the 1986 Young Concert Artists International Auditions, performs in the series on Jan. 15, and Jamaican pianist Paul Shaw, who made his New York debut in February, concludes the series on March 1.

Performances in the Young Concert Artist Series start at 8 p.m. in Bryan Recital Hall of the Moore Musical Arts Center.

Tickets for both series can be ordered by calling the music center box office at 372-8171. Discounts are available for students and senior citizens. The box office is open between noon-6 p.m. Monday through Friday.

## Faculty/Staff Publications

Sangjin Yoo, accounting and management information systems, "Decision Support System: A New Tool for Strategic Management," in *Long Range Planning*.

James Sullivan, applied statistics and operations research, "The Utilization of Social and Recreational Services by the Elderly: A Case Study of Northwestern Ohio," in *Economic Geography*.

Dwight Burlingame, University relations, "Library Fund-Raising in the United States: A Second Look," in *Library Administration and Management*, June 1987, Vol. 1, No. 3.

Six faculty members — one from each undergraduate college — were honored at Opening Day ceremonies last week as being among the University's top teachers. The six were presented with Faculty Excellence Awards, one of the highest honors given to faculty by the Undergraduate Student Government. USG president David Robinson (third from right) presented the awards to (from left) Dr. Edward Morgan, gerontology; Dr. Vincent Kantorski, musical arts; Dr. Ralph St. John, applied statistics; Dr. Steven Ludd, political science; Dr. David Gedeon, electronic technology systems; and Dr. John Piper, health, physical education and recreation.

## Olscamp remarks from page 1

recommendations from deans, directors, chairs and program heads. He said he expects the Faculty Senate to play an important role in the prioritization of the document.

Olscamp also reported that construction is progressing ahead of schedule on the \$3.65 million addition to the Business Administration Building and that work has finally begun on the Williams Hall renovation. The Overman Hall renovation is scheduled to begin in September.

Plans to renovate the Union have been dropped because of the high bids for the project.

The campus is also undergoing a landscape change. During the summer the grounds department planted 205 new trees and a tree nursery has been created with 300 maple and ash seedlings which will replace trees lost by vandalism or from natural causes.

Olscamp also mentioned some concerns including the University budget. He said, "Bowling Green, because of our enrollment mix and the way the state formulas operate, received the lowest percentage increase in the state budget of any

university." The low subsidy was the primary reason for a 9.9 percent increase in student fees, approved by the trustees earlier this summer.

The University will be able to operate this year with minimum program and personnel reductions. However, Olscamp warned, "we should reconcile ourselves to a continuation of this sort of financial framework for at least the next two years."

Two "difficulties" remain from a year ago, Olscamp said. Because of federal red tape, the financial aid office is still experiencing problems in processing student financial aid. Although some steps were taken by the U.S. Department of Education to ease the problem, the new regulations to verify loan applications are still stringent and Bowling Green does not have the staff to handle all the required work, Olscamp said.

The other difficult area concerns the salary administration policy at the University, which the president described as "ticklish and controversial." The current policy calls for increments to be distributed on a 60 percent across-

the-board and 40 percent merit basis. The Board of Trustees is questioning the policy and Olscamp said he hopes the Faculty Welfare Committee and Faculty Senate can make a recommendation on the policy by the end of fall semester.

Olscamp concluded by saying that there are many measures of a university's success and one has to do with the demand for places in the freshman class. He said high school students show a great interest in coming to Bowling Green, as evidenced by the University's continued early closing admission dates.

He said the reason for Bowling Green's popularity was "not only because of the general well-founded reputation of the University and its students, but because of our spreading reputation with faculty at other institutions, the growing research performance of our faculty, our commitment to general education revision, and the glowing reports of the campus experience which are given to parents and friends of students who study here."

"This really is a fine University," he said.

## Wolfe remarks from page 1

will strive to give a priority ranking to the goals in the mission statement. The committee also will study the method by which programs are reviewed and discontinued.

As required by the Academic Charter, the Faculty Senate will elect a five-faculty member committee to conduct the fifth-year evaluation of the vice president for academic affairs.

In the upcoming year, Wolfe said senators will strive for increased communication between the Faculty Senate Budget Committee and the Faculty Senate so that policies will be known by the senate in advance of the distribution of a policy.

Finally, Wolfe said the Senate Executive Committee will be asked to establish an ad hoc committee to study particular needs of retirees participating in the Supplemental Retirement Program. "The Faculty Personnel and Conciliation Committee will consider, and I hope, propose revisions in the procedural guidelines of that committee," Wolfe said.

Last year the Faculty Senate adopted a proposal for the re-implementation of the Early Retirement Incentive Program which would be ongoing and would allow for a five-year buyout with

continuation of the SRP. Wolfe said Dr. Eloise Clark, vice president for academic affairs, and Dr. J. Christopher Dalton, vice president for planning and budgeting, reported to President Olscamp in a recent memorandum that after consideration of the senate's proposal they had reached the conclusion that adoption of the program at this time "would not be in the best interests of the University."

Clark and Dalton offered an alternate proposal that would allow for a three-year buyout as an alternative to the SRP. Wolfe said he has reactivated the ad hoc committee of the Faculty Welfare Committee and requested it to respond to the alternative. "The president has assured me that no proposal on an ERIP will go to the Board of Trustees which has not been considered by the Faculty Senate."

Wolfe discussed goals achieved by Faculty Senate over the last year including adopting a new summer calendar; passing a resolution calling for affirmative steps to be taken to increase the number of minority faculty and staff; recommending that Undergraduate Council work closely with collegiate units to integrate cultural diversity

in the American experience into the curriculum; proposing a 9.5 percent increase in the faculty salary pool in order to achieve the 60 percentile of AAUP Category I schools; and recommending a two-year suspension of the Faculty Improvement Leave Policy to allow for a full year's leave at 70 percent of the academic year salary.

## Turn in time sheets

Due to the Labor Day holiday, Sept. 7, the payroll office would like all student time sheets turned in no later than Friday (Sept. 4).

Payday for students will remain on Sept. 18.

## Monitor

Monitor is published weekly by the Office of Public Relations for faculty and staff of Bowling Green State University. The deadline to submit material for the Sept. 7 issue is 5 p.m. Tuesday, Sept. 1.

Editor: Melissa Peper Firestone  
Photographer: William Brown  
Contributors: Clifton P. Boutelle, Teri Sharp, Gardner A. McLean Jr., Linda Swaisgood and Beth Sondgeroth.  
"Commentaries" and other notices should be sent to:  
Monitor

Tickets go on sale Monday (Aug. 31) for two return performances of the Summer Theater production of "Oliver!" The musical will be presented at 8 p.m. Friday, Sept. 11 and Saturday, Sept. 12, in Kobacker Hall of the Moore Musical Arts Center. The show features a cast of area residents and University students. Tickets are \$9, \$7 and \$5 each. A \$2 discount is available for students and senior citizens. Tickets can be reserved by calling the Moore Musical Arts Center box office at 372-8171. The box office is open between noon-6 p.m. Monday through Friday.

## Math, science teachers share experiences

Math teachers need to know more about science. Science teachers should know more about math. And they can provide better educational experiences for their students by working together. That's the premise of two University professors and 32 area teachers are helping them prove it.

Drs. Evan McFee and D. Thomas Hayes, both of education, recently concluded a three-week summer workshop for high school and middle school teachers of mathematics and science.

"Many times, students learn their subjects in isolation," Hayes explained. "But mathematics and science are sister disciplines. Teachers need to show their students how the two areas relate to one another. By providing a variety of hands-on activities in class, they can demonstrate practical applications of mathematical and scientific principles in everyday life."

The workshop, held July 20-Aug. 7, was funded by a \$48,000 grant from the U.S. Department of Education.

The funds paid instructional fees for the 32 participating teachers and allowed the purchase of a wide variety of instructional materials. Successful completion of the program, which will extend throughout the coming academic year, results in four hours of graduate credit at the University.

Designed to provide science and math teachers with an update of content knowledge in both disciplines, the workshop also sought to promote collaboration in instructional planning. Math and science teachers were paired to form 16 teams to plan and develop hands-on teaching activities that would integrate both disciplines, and supplement the regular textbook lessons for their particular grade level.

"If we teach each subject in isolation and don't teach application, we're not doing the kids any good," Hayes said. "There are lots of ways we can mix the two subjects — through in-class activities and homework assignments. For instance, a math teacher can use the process of mixing acids and bases in giving an assignment on figuring percentages."

To assist in this interdisciplinary planning, each participant constructed a science or math activity kit of teaching materials, handouts and worksheets to supplement their existing classroom resources.

Each teacher team was videotaped performing its activity in a simulated classroom. During the playback of each tape, the instructors and other teachers offered ideas for improving and expanding each lesson.

"Generally, there needs to be more communication between teachers of different subject areas," McFee said. "Teachers have so many good ideas, it's time they shared them with one another."

The workshop also provided hands-on experience in the use of microcomputers as instructional tools. Part of the grant funding was allocated for the purchase of educational software in the mathematics and science fields. The computer materials will be available to the participants, on loan, throughout the coming academic year.

Although the workshop concluded Aug. 7, participants are expected to continue exploring team-teaching and collaboration in their home schools. Hayes and McFee will be visiting and observing each teacher's classroom at least once during the academic year. At many sites they will teach a demonstration lesson at the school, or collaborate with a participating teacher in team-teaching a lesson.

## Documentary team awarded grant for new program

The documentary team of Dr. Larry Smith, humanities and English at Firelands College, and Tom Koba, director of T.R. Koba Associates, has been awarded a \$10,000 grant from the Ohio Humanities Council to produce their second video program on an Ohio author.

Their last video project, "James Wright's Ohio," also was funded by the Ohio Humanities Council, a local branch of the National Endowment

for the Humanities, and by the Ohio Arts Council as well as the Stein Trust.

The new, 30-minute video will highlight the early life and art of Kenneth Patchen, a writer and artist born in the Niles-Warren area of Ohio. It is entitled "Kenneth Patchen: An Art of Engagement."

Beginning with his *Before the Brave* poetry collection in 1936, Patchen produced almost a book a year until his death in 1972. He is regarded by many as an American original and a member of the avant-garde, pioneering experiments in poetry, fiction, poetry-and-jazz and

picture-poems in which his painted figures blend with his handwritten poems. An exhibit of Patchen's picture-poems was presented last year in Warren and now is being shown in Germany.

Smith and Koba share the role of director and producer for their films with Koba directing the photographic art and Smith writing the script. Smith is the author of the book, *Kenneth Patchen*, and has written several articles on the author. He is also the author of four books of poetry and numerous short stories, and the publisher-director of Bottom Dog Press.

Koba recently produced a historical documentary, "Erie County: The Lake Erie Escape," for the Erie County Tourist Bureau.

Production for the documentary began in July with completion expected by May 1988. The program then will become available to public broadcasting stations and will be distributed to schools and public libraries through the Ohio Humanities Resource Center.

## New coach needed at Firelands College

Firelands College is seeking a basketball coach for the 1987-88 season.

This is a part-time position with coaching as the primary responsibility and with the possibility of part-time instruction in physical education. Applicants should have a bachelor's degree and experience in coaching high school or college basketball.

To apply, or for further information, contact the Office of the Dean at Firelands at (419) 433-5560.

## Datebook

### Monday, Aug. 31

Tickets go on sale, for two return performances of the Summer Theater production of "Oliver!" The musical will be presented at 8 p.m. Sept. 11 and 12 in Kobacker Hall, Moore Musical Arts Center. Tickets can be reserved for \$9, \$7 and \$5 each by calling the box office at 372-8171. Discounts available for students and senior citizens.

Exhibition, "The Matter of Sculpture," through Sept. 18, Fine Arts Gallery. Gallery hours are 9 a.m.-4:30 p.m. Monday through Friday and 2-5 p.m. Sundays. Free.

Progressive Student Organization, 9 p.m., United Christian Fellowship Center, 313 Thurstin. The meeting is open to everyone.

## Focus on health

The Professional Development Subcommittee of Classified Staff Council will be sponsoring a one-hour seminar on general health and weight control from noon-1 p.m. Sept. 16 in the Ohio Suite of the Union. The speaker will be Shirley Hillard, RN, from the Wood County Cancer Society. Register by calling Pam Atchison at 372-7698 by Sept. 11. Lunches can be purchased in the Falcon's Nest prior to the meeting.

## Obituary

### Allen Wiley

Dr. Allen Wiley, a former member of the economics faculty and an emeritus professor of the University, died Aug. 24 in the Community Nursing Home in Bowling Green.

During his 24 years at the University, before he retired in 1969, Wiley taught a variety of courses in economics, finance and business administration.

He was a former member of the economics department curriculum committee, and had served as chairman of the faculty committee for the United Crusade of Mercy and as a member of the University Senate.

He was past president of the Ohio Association of Economists and Political Scientists, a member of the Industrial Relations Research Association, and an elder and former trustee of First Presbyterian Church in Bowling Green.

Memorials can be made to the Wood County District Public Library.

## Job line opens

Classified positions that become open to the public are posted on Tuesday and Thursday of each week. A job telephone line is available for off-campus applicants to call for position vacancies at 372-8669.

This is only for off-campus applicants. Current vacancy announcements for University employees will not be included on the job line, but are listed in the *Monitor*.

## Classified Employment Opportunities

### Eligible list

Posting expiration date: 4 p.m., Friday, Sept. 4.

9-4-1 Maintenance Repair Worker 2  
Pay range 5  
Plant Operations and Maintenance

An examination will be given for the above classification. Candidates will be ranked based on test score and training and experience, and an "eligible list" will be established. As vacancies occur, names are referred from this list. Employees may apply and take the examination even if currently in a probationary period.

### New vacancies

Posting Expiration Date: 4:00 p.m., Friday, Sept. 4.

9-4-2 Food Service Worker  
Pay range 1  
Food Operations  
Academic year, full-time

9-4-3 Medical Lab Technologist I  
Pay range 30  
Health Services  
Academic year, part-time

## Faculty/Staff Positions

The following faculty positions are available:

**Finance and Insurance:** Assistant/associate professor of finance (anticipated). Contact Stephen E. Skomp (2-2520). Deadline: Dec. 1.

**Marketing:** Assistant professor (anticipated). Deadline: Oct. 30. Also, assistant/associate professor. Deadline: Sept. 30. For both positions, contact James S. West (2-2041).
